PROSPECTOR CONSOLIDATED RESOURCES INC.
(An Exploration Stage Company)
Notes to the Financial Statements
September 30, 2006, and December 31, 2005

1. Nature of Operations

The Company is in the process of exploring its interests in resource properties and has not yet determined whether these properties contain reserves that are economically recoverable. The recoverability of amounts shown for resource properties and related deferred costs is dependent upon the existence of economically recoverable reserves, confirmation of the Company's interest in the underlying claims, the ability of the Company to obtain necessary financing to complete the development, and upon future profitable production or proceeds from the disposition thereof.

Although the Company has taken steps to verify title to mineral properties in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements or transfers and may be affected by undetected defects.

These financial statements have been prepared using Canadian generally accepted accounting principles applicable on a going concern basis, which presumes the Company will be able to realize its assets and discharge its liabilities in the normal course of operations for the foreseeable future. As at December 21, 2005, the Company has a working capital deficiency of \$213,619 (2004 – working capital of \$11,424), an accumulated deficit of \$9,876,855 (2004 - \$9,197,963) and has incurred a loss of \$679,892 (2004 - \$670,524)

The ability of the Company to continue as a going concern is in substantial doubt. The Company's continued existence as a going concern is dependent upon its ability to continue to obtain adequate financing arrangement and to achieve profitable operation. Management's plans in this regard are to obtain sufficient equity financing to enable the Company to continue its efforts towards the exploration and development of its mineral properties. These financial statements do not include adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern.

2. Summary of Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affects the amounts reported in the financial statements and the accompanying notes. Because a precise determination of many assets and liabilities is dependent upon future events, the preparation of financial statements necessarily involves the use of estimates which have been made using careful judgement. Significant estimates used in the financial statements include the estimates of the life and realization of resource properties. The amounts the Company will ultimately recover could differ materially from current estimates.

The financial statements have, in management's opinion, been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized below.

Marketable Securities

Marketable securities are recorded at the lower of cost and the quoted market value.

PROSPECTOR CONSOLIDATED RESOURCES INC.
(An Exploration Stage Company)
Notes to the Financial Statements
September 30, 2006, and December 31, 2005

2. Summary of Significant Accounting Policies - cont'd

Property, Plant and Equipment

Property, plant and equipment are recorded at cost and the Company provides for amortization computed under the declining balance method at the following rates:

Computer hardware and software	30% per annum
Field equipment	30% per annum
Office equipment	20% per annum
Vehicles	30% per annum

Resource Property Acquisition and Deferred Exploration Expenses

Costs relating to the acquisition, exploration and development of resource properties are capitalized by the Company. When production is attained, the costs will be amortized based on a method relating recoverable reserves to production. Non-producing resource properties that the Company abandons its interest in are written-off in the year of abandonment. The amounts capitalized represent costs to be charged to operations in the future and do not necessarily reflect the present or future values of the present or future value of the particular properties.

Impairment of mineral properties is assessed whenever changes in circumstances indicate the carrying amount may not be recoverable, at which time the costs are written-down to the impaired value.

Asset Retirement Obligations

Effective January 1, 2004, the Company adopted the new CICA Handbook Section 3110 "Asset Retirement Obligations", which established standards for asset retirement obligations and the associated retirement costs related to site reclamation and abandonment. The fair value of the liability for an asset retirement obligation is recorded when it is incurred and the corresponding increase to the asset depreciated over the life of the asset. The liability is increased over time to reflect an accretion element considered in the initial measurement at fair value. At December 31, 2005 or June 30, 2006 the Company has not incurred or committed any asset retirement obligations.

Impairment of Long-Live Assets

Effective January 1, 2004, the Company adopted new CICA Handbook Section 3063 "Impairment of Long-lived Assets", which requires that long-lived assets and intangibles to be held and used by the Company be reviewed for possible impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If changes in circumstances indicate that the carrying amount of an asset that an entity expects to hold and use may not be recoverable, future cash flows expected to result from the use of the asset and its disposition must be estimated. If the undiscounted value of the future cash flows is less than the carrying amount of the asset, impairment is recognized. Management believes that there has been no impairment of the Company's long-lived assets as at December 31, 2005 or June 30, 2006.

PROSPECTOR CONSOLIDATED RESOURCES INC.
(An Exploration Stage Company)
Notes to the Financial Statements
September 30, 2006, and December 31, 2005

2. Summary of Significant Accounting Policies - cont'd

Foreign Exchange

The accounts recorded in foreign currencies have been translated into Canadian dollars on the following basis:

- monetary assets and liabilities at the rate of exchange in effect at the balance sheet date;
- non-monetary assets and liabilities at the rates of exchange in effect on the respective dates of transactions; and
- revenues and expenses at average rates of exchange for the year.

Stock-Based Compensation

Effective January 1, 2004, the Company adopted the new recommendations of the CICA regarding stock-based compensation with respect to directors and employees, whereby all stock options granted are accounted for under the fair value-based method. Under this method, the fair value of all stock options is estimated at the grant date and the total fair value of the options is amortized over the vesting periods as compensation expense, with an offset to contributed surplus. The fair value method of accounting for option granted to directors and employees was adopted retroactively, with prior periods not restated. The cumulative effect of the change on prior periods is reflected by an increase of \$122,284 in the opening deficit, with an offset in the contributed surplus account on January 1, 2004. If the change had been applied on a retroactive basis, the net loss in 2003 would have increased from \$515,759 to \$576,798.

Income Taxes

The company accounts for income taxes using the liability method. Under this method, future income tax assets and liabilities are determined based on temporary differences between the accounting basis and the tax basis of assets and liabilities. These temporary differences are measured using substantively enacted income tax rates. Future tax benefits are recognized to the extent that realization of such benefits is considered more likely than not. The effect of a change in income tax rates on future income tax assets and liabilities is recognized in earnings in the period that the change occurs.

Earnings (Loss) Per Share

Basic and diluted earnings (loss) per share are calculated using the treasury stock method to determine the dilutive effect of options and warrants. For the years presented, the calculation of diluted earnings (loss) per share proved to be anti-dilutive.

3. Financial Instruments

The Company's financial instruments consist of cash, accounts receivable and accounts payable, the fair values of which approximate their carrying values. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments.

PROSPECTOR CONSOLIDATED RESOURCES INC.
(An Exploration Stage Company)
Notes to the Financial Statements
September 30, 2006 and December 31, 2005

Beowawe Property (Nevada)

In 2004, the Company entered into an option agreement with a related party (Note 9) (“Alpha option”), whereby it can acquire a 100% interest in 140 unpatented mining claims and 4 patented fee lands in north eastern Nevada by issuance of up to 1,800,000 common shares in three separate tranches (300,000 shares issued), incurring exploration costs of \$700,000 on the property, with \$350,000 to be spent by July 15, 2005 and an additional \$350,000 to be spent by July 15, 2006. Under the terms of the agreement, the optionor is to retain a 2% net smelter return royalty which the Company has the right to reduce to 1% upon payment of \$1,000,000 at any time up to the third anniversary of commencement of commercial production.

In 2004, the Company entered into an additional option agreement with Atna Resources Inc. (“ATN”) to combine their respective Boewawe gold property interests whereby the Company would acquire a 60% interest in ATN’s Boewawe property interests by issuing a total of 1,800,000 common shares to ATN in three separate tranches (300,000 shares issued), incurring a total of U.S. \$700,000 in exploration costs on the combined property, with US \$250,000 to be incurred by July 15, 2005 and an additional U.S.\$500,000 to be incurred by July 15, 2007, making all payments required under ATN’s agreements to acquire the ATN properties, and assigning a 40% interest in the Alpha Beowawe properties to ATN.

Payments required under ATN’s Beowawe agreements include a cash payments of U.S. \$20,000 by December 1, 2006 and various annual advance royalties ranging from U.S. \$50,000 to U.S. \$107,000 until commencement of commercial production and are subject to overriding net smelter returns royalties ranging from 1% to 3%. The Company was also granted a secondary option whereby it can increase its interest in the combined property from 60% to 70% by obtaining a bankable feasibility study by July 15, 2011, which may be extended by making payments of U.S. \$100,000 not less than 30 days prior to the commencement of each successive year.

On July 15, 2005 the Company terminated its option agreement with Atna as it felt that the property did not have the necessary status to compete for investor support in the current market.

Indian Creek Property (Nevada)

In 2005, the Company negotiated an option agreement to acquire a 100% interest in mining claims located in Lander County, Nevada by making cash payments of U.S. \$320,000 (comprised of U.S. \$10,000 upon signing (paid), U.S. \$10,000 by June 30, 2005 (paid), U.S. \$50,000 by December 31, 2005, U.S. \$100,000 by December 31, 2006 and U.S. \$150,000 by December 31, 2007) and issuance of 450,000 common shares in five separate tranches. The optionor is to retain a 3% net smelter returns royalty which the Company has the right to reduce to 1 1/2% upon payment of U.S.\$500,000 for each 1/2% reduction.

The option payment of U.S. \$50,000 that was due by December 31, 2005 was not made and the option was subsequently terminated. All costs related to the property were written-off as at December 31, 2005.

(An Exploration Stage Company)
Notes to the Financial Statements
September 30, 2006 and December 31, 2005

McVicar Lake Property (Ontario)

In April 2002, the Company entered into an agreement whereby it could acquire a 100% interest in a block of mineral claims located within the McVicar Lake Greenstone Belt in the Uchi Subprovince of Ontario totalling 237 units comprising of 3,792 hectares. Consideration for the acquisition included an initial payment of \$45,000, (paid) plus the issue of 200,000 common shares (done), staged cash payments totalling \$210,000 over four years commencing in 2003, expenditure of \$1,350,000 in exploration on the claims over the next four years, payment of \$55,000 for a report on the property (paid), and the issuance of an additional 500,000 common shares upon completion of a preliminary feasibility report on the property. A finders fee of 50,000 common shares was also paid by the Company. During 2002, the Company completed a staking program and added a further 113 claim units to the existing claim block.

In July 2002, the Company concluded an agreement with Continuum Resources Inc. where by Continuum could earn a 50% interest in the McVicar Lake gold prospect by making a total of \$145,000 in payments to the Company and committing to \$896,000 in exploration expenditures over a three year period. Continuum paid \$95,000, issued 300,000 common shares to the Company and incurred the required exploration expenditures on the property. During 2004, Continuum terminated its sub-option with the Company and the Company then terminated its original option and wrote-off all related costs of the property.

6. Capital Stock – cont'd

Private Placements

In September 2005, the Company completed a non-brokered private placement for net proceeds of \$152,150. The private placement consisted of 3,150,000 units at a price of \$0.05 per unit. Each unit consisted of one common share and one common share purchase warrant exercisable until September 22, 2007 at the exercise price of 0.10 per share.

In May 2004, the Company issued 815,000 common shares at \$0.15 per share with warrants attached, entitling the holders to purchase an additional 815,000 common shares at \$0.18 per share until May 26, 2005.

In November 2004, the Company issued 4,310,000 common shares at \$0.10 per share under a brokered private placements for proceeds, net of issuance costs, of \$383,000. The placement included warrants entitling the holders to purchase an additional 5,262,500 common shares at \$0.15 per share until November 17, 2005.

Warrants

Outstanding warrants at June 30, 2006 entitle the holders to purchase up to the following number of shares of the Company:

Number of Warrants	Exercise Price	Expiry Date
3,150,000	\$0.10	September 22, 2007

7. Stock Options

The Company has stock option plan for directors, officers and certain consultants. Under the plan, the Company may grant options for up 3,219,950 shares of common stock.

Changes to the stock options are shown in the following table:

Stock-Based Compensation

Effective January 1, 2004, the Company adopted the fair value method of accounting for all stock based compensation (Note 2). During the year ended December 31, 2005, 1,212,750 stock options were granted to directors, officers and consultants at a weighted average price of \$0.10 per share and these options had an average fair value of option that was charged to the statement of loss in 2004 was \$125,594.

The fair value of each option in 2004 was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions:

Risk-free interest rate	3.85%
Expected life of options (years)	4.87
Dividend yield	-
Volatility	107%

8. Contributed Surplus

In the period ended December 31, 2005 an additional \$77,645 (2004 - \$247,878) was recorded in contributed surplus based upon the fair value of stock options issued by the Company.

9. Related Party Transactions

Management and consulting fees of \$0 (2004 - \$16,250) were charged by a company controlled by a former director and an officer of the Company.

Directors fees of \$0 (2004 - \$5,000) and consulting and management fees of \$90,000 (2004 - \$69,750) were earned by directors for their services during the year.
